

Upcoming Compost Workshops!

(register online at bbg.org)

Composting in the City

Learn how leaves, kitchen scraps and garden trimmings can become garden gold through composting. Making high quality compost doesn't take much time, work, or space. This class explains how to make and use compost while avoiding common composting challenges.

July 9th, August 20th

Composting with an Outdoor Worm Bin

Get ready to graduate from an indoor worm bin to an outdoor vermicompost system. Learn how to set-up, manage and maintain an outdoor worm bin all year long. It is recommended that you have previous worm bin experience.

July 30th

Composting with Black Solider Fly Larvae

Black solider fly larvae (BSFL) are non-pests that rapidly turn food scraps into a high protein feed. Learn about these voracious composting insects and how an outdoor BSFL bin can drastically reduce waste while creating a value-added product.

August 6th

Composting with Lovely Redworms

Compost your food scraps and harvest nutrient-rich vermicompost all year long by harnessing the power of worms. In this workshop we will learn how to make and maintain an indoor vermicomposting system.

July 16th, September 10th
